A MESSAGE TO PARENTS/CARERS

January 2020

Dear Parents/Carers,

It is our job as a school to ensure that all pupils receive a broad and balanced curriculum. We hope to equip pupils with a wide experience of skills and knowledge to help them progress and grow into mature, well educated people.

We are confident that the curriculum provided here is of the highest standard; all courses are chosen for the benefit of pupils, helping them to maximise their future options, while allowing them to learn varied and interesting subjects. We do not introduce courses to increase positions in league tables; each course is a qualification respected by employers and Further Education establishments. However, as pupils mature and become more aware of their interests, we feel it is important for pupils to have some input into what they study.

This booklet introduces these choices and explains how the options process works. It is worth noting that the school has spent a long time reviewing this process and the options available this year have changed slightly from the previous year.

Please take your time to read this booklet carefully with your child and do not hesitate to contact me or other staff at the school if you need further assistance.

Yours faithfully,

Mr P Beale

Deputy Headteacher

SELECTING YOUR OPTIONS

Although selecting subjects to study in Year 10 can be an exciting and liberating experience, it can be a very stressful time as well. We urge you and your son/daughter to think carefully about the choices to be made, to discuss the possibilities and to consult as widely as possible. It is difficult, if not impossible, to change courses once we get into Year 10. Pupils can feel very empowered by choosing some of the courses they study, but if it is not possible to study a certain subject, it can feel like that is a disaster.

We do everything we can to give every pupil the subjects he/she selects, but this is not always possible.

This can happen for two reasons:

- 1. Insufficient numbers opt for a subject and it is not viable to run it.**
- 2. Too many pupils opt for a subject and we have to ask some to reconsider.**

If too many pupils opt for a subject, we consider which pupils to put into their reserve choice by taking the following into account:

1. Late applications: if the subject choice is full or oversubscribed when the form is received, then the pupil will be referred to their reserve choice. It is **very important**, therefore, that pupils meet the deadline given.
2. Volunteers: pupils asked to volunteer to move to another subject.
3. Response grades: those with the highest response grades on their reports will be given priority (effort, homework, behaviour - but not achievement in the subject). The Head of Department will be consulted where reports do not give sufficient information.

In case of referral to a reserve choice, a waiting list will be formed in case a space becomes available. Further information can be found on the school website - www.reephamhigh.com - Parents & Carers - Year 9 Options - 'Choices at 13/14 and Supporting Choices for Key Stage 4' - which is a Norfolk County Council general advice document for parents.

For these reasons, it is very important to read the information and instructions in this booklet thoroughly and complete the options forms carefully and accurately.

The English Baccalaureate (Ebacc)

The English Baccalaureate was introduced as a performance measure for schools in England in the 2010 performance tables. **It is not a qualification.** The measure calculates the number of pupils studying and the average attainment score that they have achieved at GCSE in English, Mathematics, History or Geography, two sciences and a modern or ancient language. To achieve this at Reepham High School you need to select:

- English [compulsory]
- Mathematics [compulsory]
- At least 2 sciences (which may include Computer Science) [compulsory]
- A modern foreign language [highly recommended]
- (French, Spanish or Chinese Mandarin)
- History or Geography [compulsory]

The government introduced this as a performance measure as it felt these academic subjects were highly valued by the Russell Group Universities. It is **not** currently required for entry to any Russell Group university. Most universities require English and Maths. A few may also require a modern foreign language. Successful applicants are normally expected to have achieved good grades in a range of subjects at GCSE or equivalent, and to meet any specific requirements for their chosen course. However the performance measure continues to be included in school performance tables and it is possible that in future years it might be regarded as an entry requirement for some universities and some professions.

The Department for Education has set a target for 90% of pupils to take these subjects by 2025.

If you have a clear career path decided, we recommend that you look ahead at the requirements for that career, to ensure that your option choices will support them. If you need assistance doing this please contact the school.

What is a Russell Group University?

The Russell Group represents 24 leading UK universities which are committed to maintaining the very best research, an outstanding teaching and learning experience and strong links with business and the public sector. More information can be found at www.russellgroup.ac.uk

If the EBacc is not a qualification, does it matter?

The EBacc will not directly make a difference to your progression from High School; however we feel it is important to make all pupils and their parents aware of any government aims within education and anything which may potentially become important.

OPTIONS AND HOURS OF STUDY

In Years 10 and 11 pupils will study a combination of compulsory and optional subjects.

All pupils will need to study the same core subjects:

- English
- Mathematics
- Science (either combined or triple Science—this would have been decided at the beginning of Year 9)
- Core Physical Education (this is a non-examined subject)

Alongside these regular lessons, pupils will also be involved in Personal, Social, Health and Economic Education (PSHEE) events and guidance.

The rest of the lessons studied are subject to a certain amount of choice. We are obliged and believe it right to ensure that pupils continue to have a broad and balanced curriculum.

Although we welcome choice and do our utmost to accommodate pupils' preferences, Reepham High School reserves the right to decide a pupil's suitability for a course.

All option subjects are split into different categories:

Humanities and Social Sciences:

Business Studies
Child Development
Computer Science
Geography
History
Religious Education
Sociology

Creative and Technical Skills:

Art
Drama
Food Preparation
French
Graphic Design
Mandarin
Media
Music
Photography
Physical Education
Resistant Materials
Spanish
Textiles

Practical Skills:

Care of the Countryside
Construction

To ensure a balanced curriculum, pupils will be required to study subjects from at least **two** different categories.

A pupil studies for 50 hours per fortnight and lessons are likely to be distributed in the following way:

	English	Maths	Science	PE	Geography/ History	Option 1	Option 2	Option 3	Personal, social & employability studies
Year 10	8	9	9	4	5	5	5	5	0
Year 11	8	7	10	4	5	5	5	5	1

CHOOSING YOUR OPTIONS

When planning your curriculum of study, there are certain decisions we ask you to make. These decisions are slightly different depending on your plans after High School. No matter what your plans, it is important to keep a variety of different subjects that cover a number of different skills.

Important considerations:

RHSC strongly recommends that you take a modern foreign language at GCSE if you expect to take an academic route in the future. It shows a high level of skill and some university courses (which are not language based) require this.

The work-related courses have very limited places and are only offered to pupils for whom RHSC thinks them particularly appropriate.

Pupils will need to make the following choices:

<p style="text-align: center;">CHOOSE EITHER GEOGRAPHY OR HISTORY</p> <p style="text-align: center;">CHOOSE 1 SUBJECT FROM BOX 1</p> <p style="text-align: center;">CHOOSE 1 SUBJECT FROM BOX 2</p> <p style="text-align: center;">CHOOSE AN ADDITIONAL SUBJECT FROM EITHER BOX 1 OR 2</p>
--

Geography or History

<u>Box 1</u>
Business Studies
Child Development
Computer Science
Geography
History
Media
Religious Education
Sociology
Care of the Countryside*
Construction*

<u>Box 2</u>
Art ¹
Drama
Food Preparation
French ³
Graphic Design ²
Mandarin ³
Music
Photography
Physical Education
Resistant Materials ²
Spanish ³
Textiles ¹

¹ Art and Textiles cannot be combined.

² Graphic Design and Resistant Materials cannot be combined.

³ Your chosen language must have been studied in Year 9

*Both Care of the Countryside and Construction are work-related learning courses and are not GCSE (or equivalent) qualifications. These options are designed for pupils who believe that the construction industry or rural work will be a likely career path. There are limited spaces for these courses and places will be offered to pupils for whom we feel it is most appropriate. Pupils may only study one of these options.

FREQUENTLY ASKED QUESTIONS

Why do I have to take a creative or technical subject?

Although pupils can now begin to specialise at GCSE, it is still important to have a broad and balanced curriculum. Although some subjects may not seem to relate directly to a chosen career, a wide level of knowledge and skills is always useful.

For example, there are calls from some surgeons for medical pupils to have studied more creative subjects to increase manual dexterity. Roger Kneebone, Professor of Surgical Education at Imperial College, London, says he has seen a decline in the manual dexterity of students over the past decade. He claims this is a problem for surgeons, who need craftsmanship as well as academic knowledge. "An obvious example is of a surgeon needing some dexterity and skill in sewing or stitching," he says. "Such skills might once have been gained at school or at home, whether in cutting textiles, measuring ingredients, repairing something that's broken, learning woodwork or holding an instrument."

Is the EBacc an extra qualification?

No, it is a measure of performance for the High School. You will not receive any acknowledgement for studying the English Baccalaureate, but the subjects *may* prove useful depending on your future plans.

Why can I not take two practical courses?

The structure of the GCSE curriculum at Reepham has been redesigned and pupils will now take between 8 and 10 GCSEs, rather than between 9 and 11. In the past a small number of pupils took two practical courses, but still sat 8 GCSEs. Pupils can now take one practical course and sit 8 GCSEs. This allows more time for each option subject.

Isn't it a legal requirement to take RE for GCSE?

Schools must *offer* GCSE RE, you have the right to opt out of this choice. All pupils will experience social, moral and religious teaching and guidance through non-curricular events, such as Impact Days.

Can I take Geography and History?

Yes, select one at the beginning and choose the second from the Humanities and Social Sciences box.

Why are my choices restricted?

All of the classes that take place in the school must fit within a timetable. This allows the school to have sufficient teachers and rooms available for every lesson. Unfortunately these are limiting factors and we have to give options that will fit into the timetable.

Where can I find further information on careers guidance?

Mrs Osborne is our careers advisor and can be contacted for help and guidance with any future plan.

If you are thinking about a career that requires a degree, it can be useful to know what experience and qualifications you need to access particular university courses. These can be seen at www.UCAS.com and more details can be found on individual university websites. The "Informed Choices" document provided by the Russell Group universities is also very informative. This can be downloaded from: www.informedchoices.ac.uk

QUALIFICATIONS

The General Certificate of Secondary Education (GCSE)

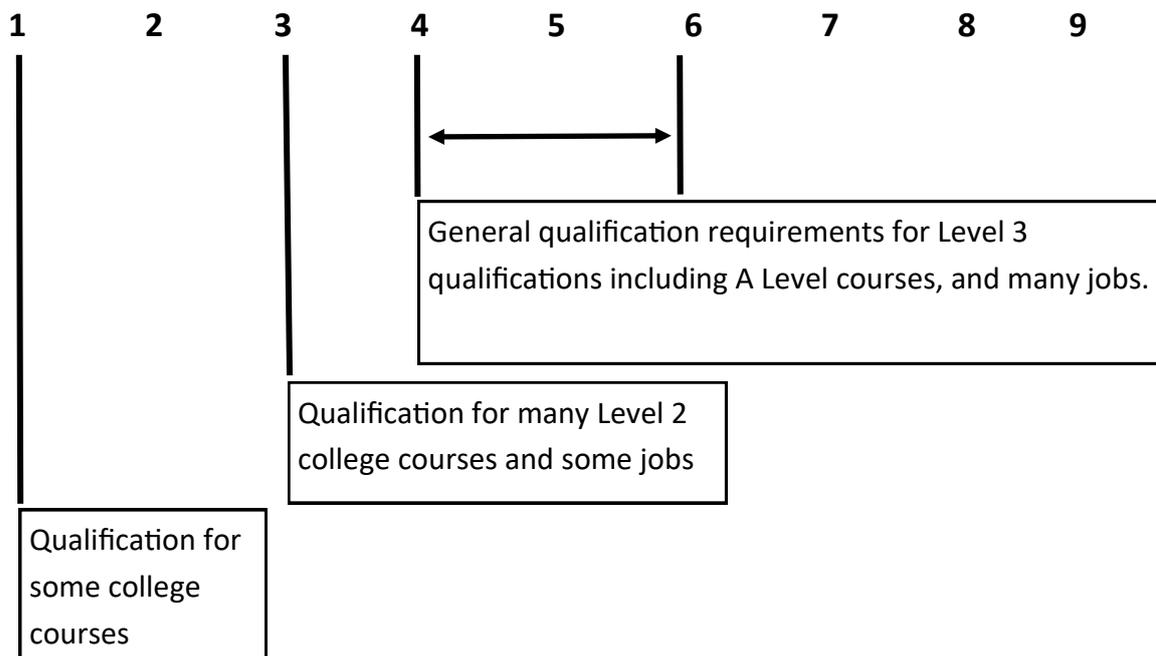

Pupils will usually be entered for a GCSE examination in each of their subjects at the end of the two year course. The examinations test understanding, knowledge, the application of knowledge, practical and other skills.

All GCSEs have now been reformed, with a new grading system of 1-9.

The government have said a Grade 5 is a 'strong pass', and Grade 4 a 'standard pass'.

In some subjects pupils of all abilities sit the same examination papers, in other subjects examination papers will be set at different levels.

Grades are awarded along the following lines:

The impact of GCSE qualifications when applying for university:

The GCSE or other standard level entrance requirements for individual degree courses are quite varied. In some cases, a particular subject or grade is required at standard level, if it isn't being offered at advanced level. The summary below gives an idea of some of the GCSE requirements that you might come across for certain degree courses. Remember that these are only examples and requirements can differ from one university to another. It's important to check university websites for detailed requirements before applying.

Applicants to study **Medicine, Dentistry** and **Veterinary Science** are usually required to have very good GCSE results in Maths, Science and English.

Applicants to study **Teacher Training** are required to have a minimum Grade 4 in GCSE Maths, Science and English. Some universities may ask for a minimum of Grade 5.

For a degree in **English**, universities often look for applicants to have a GCSE in a modern or classical language. For a **Business** degree, sometimes a Grade 7, or more often at least a Grade 6, is required in GCSE Maths. A Grade 7 in Maths is often required for a degree in **Psychology**, and a Grade 7 in Science may sometimes be required. To study a science subject at university (including **Biology, Chemistry** or **Physics**) applicants who are not offering Maths at advanced level will often need to have achieved a minimum of a Grade 5 in Maths at GCSE.

NON GCSE QUALIFICATIONS:

Please note that all courses in the lists on pages 5 and 6 are GCSE qualifications, except:

- *Child Development, which is a Cambridge National - this is an equivalent qualification to a GCSE (see table).*
- *Care of the Countryside, which is an ASDAN personal development course. Pupils work towards achieving Bronze, Silver or Gold. Some pupils who do particularly well will be entered for a Level 1 qualification equivalent to Grades 1 - 3 at GCSE.*
- *Construction, which is a City & Guilds Level 1 course equivalent to Grades 1 - 3 at GCSE.*

Cambridge National Grade	GCSE equivalent
Level 2 Distinction*	8.5
Level 2 Distinction	7
Level 2 Merit	5.5
Level 2 Pass	4
Level 1 Distinction	3
Level 1 Merit	2
Level 1 Pass	1.25

The details of proposed courses for 2020 - 2021 given in this booklet are correct at the time of publication, but your attention is drawn to the fact that it may not always be possible to run those courses which attract too few pupils.

A Summary of the Course Planning Process

January	:	Year 10 courses booklet issued to pupils
30th January	:	Options Evening
4th March	:	Option forms deadline
March/April	:	Senior members of staff interview those pupils who do not get their first choices
May	:	Formal offers made to pupils
May/June	:	Pupils (and parents if they wish) attend interviews with senior staff to discuss and finalise option choices

As part of this process, pupils will be interviewed individually and parents will have the opportunity to discuss option choices with subject teachers at the Options Evening on Thursday 30th January.

It may be more appropriate for a few selected individuals to attend a work-related learning placement, which does not lead to a qualification, but develops relevant skills. Pupils selecting a practical skill option can enquire about this possibility and, if appropriate, we will endeavour to secure a placement. Option Choices form to be returned to the school by Wednesday 4th March 2020.

Thinking ahead....

Once students have completed their GCSEs, they may be thinking of taking A Levels and then going on to university to study for a degree level course, higher apprenticeship or employment.

Colleges and sixth forms offer different courses and may have different entry requirements and application deadline dates. We very much hope that our students will want to study their A Levels at Reepham College. Students can look at the prospectus and view the current entry requirements at www.reephamcollege.com. A College Prospectus with up to date information will be made available for students in the September of Year 11, and we offer a range of applicant events and activities to support students with their application.

At Reepham College we offer Level 3 Courses in a range of subjects including; Art, Biology, Business Studies, Chemistry, Computer Science, Economics, English Language and English Literature, French, Further Maths, Geography, Graphic Communication, Health & Social Care, History, Law, Mathematics, Media Studies, Music, Photography, Physical Education, Physics, Politics, Psychology, Sociology, Spanish and Textiles. (Subjects are subject to change).

Many Reepham College students continue on to study at degree level. It is important that you ensure your GCSE and A level choices support any future plans, or if you are unsure, keep your future options open.

UCAS <http://www.ucas.ac.uk/> is the organisation responsible for managing applications to Higher Education (degree) courses in the UK. If students have already thought of a career or degree in which they are interested, you may wish to look at the UCAS website, which has lots of useful information regarding A Levels and GCSEs required.

Representatives from the College leadership team will be available to answer questions and offer advice at the Year 9 Options Evening. If you require any further information regarding Reepham College or advice on using the UCAS website please contact: cdurban@reephamcollege.com.

Core Subjects

All pupils will follow these courses.

English

Mathematics

Science

Physical Education (non-examined)

All pupils study for two GCSEs, English Language and English Literature. The subjects are assessed by terminal examinations; there is no coursework for either subject.

ENGLISH LANGUAGE GCSE

Exam Board & Code - AQA 8700

Course Content

For English Language, reading and writing are equally weighted and each comprises 50% of the GCSE marks. In preparation for the examinations, pupils will learn to analyse extracts from modern and nineteenth/twentieth century fiction and non-fiction texts for analysis. Pupils are required to identify and analyse a writer's use of structure, language and viewpoint. Spelling, punctuation and grammar make up 20% of the overall marks for the GCSE English Language qualification.

Paper 1: Exploration in Creative Reading and Writing

What's assessed - Section A: Reading - one literature fiction text with questions on the writer's methods.

Section B: Writing - descriptive or narrative writing.

How it's assessed: Written exam: 1 hour 45 minutes - 80 marks - 50% of GCSE

Questions:

Reading (40 marks) (25%) - one single text

- 1 short form question (1 x 4 marks)
- 2 longer form questions (2 x 8 marks)
- 1 extended question (1 x 20 marks)

Writing (40 marks) (25%)

- 1 extended writing question (24 marks for content, 16 marks for spelling, punctuation and grammar).

Paper 2: Writers' Viewpoint and Perspectives

What's assessed - Section A: Reading - one non-fiction text and one literary non-fiction text.

Section B: Writing - writing to present a viewpoint

How it's assessed: Written exam: 1 hour 45 minutes - 80 marks - 50% of GCSE

Questions:

Reading (40 marks) (25%) - two linked texts

- 1 short form question (1 x 4 marks)
- 2 longer form questions (1 x 8 marks & 1 x 12 marks)
- 1 extended question (1 x 16 marks)

Writing (40 marks) (25%)

- 1 extended writing question (24 marks for content, 16 marks for technical accuracy)

Non-examination Assessment: Spoken Language

The spoken element is not included as part of the GCSE but is awarded separately. To satisfy the exam board's requirements, pupils must be filmed making their presentations, with the recording submitted to the examination board for moderation.

What's assessed -

- presenting
- responding to questions and feedback
- use of Standard English

Assessed:

- teacher set throughout course
- marked by teacher
- separate endorsement (0% weighting of GCSE)

ENGLISH LITERATURE GCSE

Exam Board & Code - AQA 8702

Course Content

GCSE English Literature involves the study of a range of texts, including a Shakespeare play, a poetry anthology, a modern drama, and a nineteenth-century novel. Pupils must learn the skills required to analyse unseen poetry.

Paper 1: Shakespeare and the 19th-century novel

What's assessed:

- a Shakespeare play
- a 19th-century novel

How it's assessed: Written exam: 1 hour 45 minutes - 64 marks - 40% of GCSE (closed book)

Questions:

Section A: Shakespeare: pupils will answer one question on their play of choice. They will be required to write in detail about an extract from the play and then to write about the play as a whole.

Section B: The 19th-century novel: pupils will answer one question on their novel of choice. They will be required to write in detail about an extract from the novel and then to write about the novel as a whole.

Paper 2: Modern texts and poetry

What's assessed :

- a Modern prose or drama text
- the poetry anthology
- unseen poetry

How it's assessed - Written exam: 2 hour 15 minutes - 96 marks - 60% of GCSE (closed book)

Questions:

Section A - Modern texts: Pupils will answer one essay question from a choice of two on their studied modern prose or drama text.

Section B - Poetry: Pupils will answer one comparative question on one named poem printed on the paper and one other poem from their chosen anthology cluster.

Section C - Unseen poetry: Pupils will answer one question on one unseen poem and one question comparing this poem with a second unseen poem.

MATHEMATICS GCSE

Exam Board & Code - AQA 8300

Course Content

Mathematics is a core subject of the national curriculum and is studied by all pupils from the age of five up to sixteen. There are many reasons for this, including the role played by mathematics in many other subjects. Topics learnt in mathematics are used and developed in science, technology, engineering and economics. The language of mathematics is international. The subject transcends cultural boundaries and its importance is universally recognised.

Skills the Course will Develop

As well as helping pupils to consolidate their numeracy skills, the course will also enable pupils to deal with abstract ideas. It is important that pupils are able to carry out calculations and explain their method in a logical and efficient manner. It is imperative that pupils therefore have their own calculator (preferably scientific) so they are familiar with all the functions.

The introduction of functional maths puts a greater emphasis on problem solving, process skills and applying mathematics in context.

Mathematics equips pupils with uniquely powerful ways to describe, analyse and interpret situations. Pupils who are functional in mathematics and financially capable are able to think independently in applied and abstract ways, can reason, solve problems and assess risk.

Assessment Information

The new GCSE will be assessed by examination only, by sitting three 1 hour 30 minute papers, and pupils will be awarded one of nine grades, represented by the highest level of attainment.

There will be two levels of entry:

Higher - grades 9-4

Foundation - grades 5-1

Career/Life Skills/Value of Subject

Mathematics is regarded as a vital requirement for many college courses and also a wide range of jobs. Mathematics is frequently found in everyday life, including pay, tax, insurance, shopping, travel and measuring.

It is important for all members of a modern society to learn mathematics, as a habit of mind, for its use in the workplace, business and finance, and for personal decision-making.

Mathematics will enable pupils learn skills that they will use for the rest of their lives.

Pupils should be aware that some universities are requesting a Grade 4 and others are requesting a Grade 5. This will affect their eligibility for certain institutions should they choose to continue with their education.

The Science Department will be running two Science courses:

- **Double Science - GCSE Combined Science: Trilogy**
- **Triple Science - GCSE Biology, Chemistry and Physics**

DOUBLE SCIENCE - GCSE Combined Science: Trilogy
Exam Board & Code - AQA 8464

Course Content

Pupils study the GCSE Combined Science: Trilogy course in Years 9, 10 and 11. This means that each pupil gains **two** combined GCSEs in Science.

Aims and Learning Outcomes

This course encourages pupils to:

- develop scientific knowledge and conceptual understanding of Science
- develop understanding of the nature, processes and methods of Science
- develop and learn to apply observational, practical, modelling, enquiry and problem-solving skills, both in the laboratory, in the field and in other learning environments
- Develop their ability to evaluate claims based on Science through critical analysis of the methodology, evidence and conclusions, both qualitatively and quantitatively

Assessment Information

100% written examinations.

This qualification is linear. Linear means that pupils will sit all their exams at the end of the course. There are six written papers: two Biology, two Chemistry and two Physics. Each of the papers will assess knowledge and understanding from distinct topic areas. Each paper is 1 hour 15 minutes and makes up 16.7% of the GCSE.

Pupils are also required to complete 16 practical activities. Questions in the written exams will draw on the knowledge and understanding pupils have gained by carrying out the practical activities. These questions will count for at least 15% of the overall marks for the qualification.

We normally rotate the classes and teachers, so that in the main, classes are taught by a specialist in that area of Science.

Career/Life Skills/Value of Subjects

Science is part of the core curriculum. It is a vital ingredient of a huge variety of modern careers, from hairdressing to medical work, to engineering and to animal welfare. A good general knowledge of Science will enable pupils to understand the ever changing world of today.

TRIPLE SCIENCE - Biology, Chemistry, Physics Exam Board & Codes - AQA 8461, 8462, 8463

Triple Science is **ONLY** for invited pupils.

Course Content

Pupils study the three separate Sciences; Biology, Chemistry and Physics in Years 9, 10 and 11. This means that each pupil gains **three** separate GCSEs in Biology, Chemistry and Physics.

Aims and Learning Outcomes

This course encourages pupils to:

- develop scientific knowledge and conceptual understanding of Biology/Chemistry/Physics
- develop understanding of the nature, processes and methods of Biology/Chemistry/Physics
- develop and learn to apply observational, practical, modelling, enquiry and problem-solving skills, both in the laboratory, in the field and in other learning environments
- develop their ability to evaluate claims based on Biology/Chemistry/Physics through critical analysis of the methodology, evidence and conclusions, both qualitatively and quantitatively

Assessment Information

100% written examinations.

These qualifications are linear. Linear means that pupils will sit all their exams at the end of the course.

Biology: There are two written papers and each of the papers will assess knowledge and understanding from distinct topic areas. Each paper is 1 hour 45 minutes and makes up 50% of the GCSE.

Pupils are also required to complete 8 practical activities. Questions in the written exams will draw on the knowledge and understanding pupils have gained by carrying out the practical activities. These questions will count for at least 15% of the overall marks for the qualification.

Chemistry: There are two written papers and each of the papers will assess knowledge and understanding from distinct topic areas. Each paper is 1 hour 45 minutes and makes up 50% of the GCSE.

Pupils are also required to complete 8 practical activities. Questions in the written exams will draw on the knowledge and understanding pupils have gained by carrying out the practical activities. These questions will count for at least 15% of the overall marks for the qualification.

Physics: There are two written papers and each of the papers will assess knowledge and understanding from distinct topic areas. Each paper is 1 hour 45 minutes and makes up 50% of the GCSE.

Pupils are also required to complete 8 practical activities. Questions in the written exams will draw on the knowledge and understanding pupils have gained by carrying out the practical activities. These questions will count for at least 15% of the overall marks for the qualification.

We normally rotate the classes and teachers, so that in the main, classes are taught by a specialist in that area of Science.

Career/Life Skills /Value of Subjects

Science is part of the core curriculum. It is a vital ingredient of a huge variety of modern careers, from hairdressing to medical work, to engineering and to animal welfare. A good general knowledge of Science will enable pupils to understand the ever-changing world of today.

P.S.H.E.E - Personal, Social, Health & Economic Education

P.S.H.E.E aims to support pupils through their transition from KS3 to KS4 and beyond, helping the pupils fulfil their potential. It will focus on their continuing personal development.

We endeavour to bring in external providers with expertise in the world of work and aid pupils through the range of topics below.

- Careers including: colleges, training, employment post 16
- Stress and how to cope with it at 16
- Preparation for interviews
- Drugs education
- Financial literacy
- Toward success
- World of work
- Work experience
- Relationships and sex education

The key skills that pupils will develop are knowledge, understanding and development of oneself, and understanding of the post 16 world and how they fit into the wider world.

P.S.H.E.E also aims to work alongside other subjects, encouraging use of action planning, new learning and revision techniques, target setting, organisational skills and preparing pupils for mock exams and GCSEs in Year 11.

The P.S.H.E.E curriculum contains a unit of work on relationships. This will at times involve consideration of sexual matters. We will endeavour to notify parents in advance of this unit being taught, as parents have a statutory right to remove their child from sex education by notifying the school in writing.

This subject will be covered through Impact Days, pastoral time and using a Personal, Social & Employability studies period in Year 11.

There is no examination in this course.

Miss Reid - Teacher in Charge of P.S.H.E.E

PHYSICAL EDUCATION

All pupils will take two lessons of Physical Education per week in Years 10 and 11. The course will emphasise the importance of physical fitness in leading a healthy, active lifestyle. It provides an opportunity for them to take a responsibility for their learning and choose either a competitive or social approach to their lessons.

Winter activities include: badminton, trampolining, table tennis, fitness, netball, dodgeball, football, handball, basketball and rugby.

Summer activities include: tennis, athletics, cricket, rounders and softball.

There is no examination in this course.

Mr J Easton - Acting Head of Physical Education

English Baccalaureate Subjects

GCSE - Computer Science

GCSE - French

GCSE - Mandarin

GCSE - Spanish

COMPUTER SCIENCE GCSE

Exam Board & Code - OCR J276

Course Content

The new (1-9) GCSE Computer Science course gets pupils working with real-world, practical programming techniques that give them a good understanding of what makes technology work. Developed collaboratively with teachers, industry and the wider computer science community, the GCSE has built-in progression to further studies and is recognised as developing the skills that employers value.

The qualification is split into three components:

Component 01 - Computer Systems (40% of GCSE): The first component is an exam focused on computer systems, covering the physical elements of computer science and the associated theory.

Component 02 - Computational Thinking, Algorithms and Programming (40% of GCSE): This component is focused on the core theory of computer science and the application of computer science principles.

Component 03 - Programming Project (non-exam assessment) (20% of GCSE)

This component is the non-exam assessment where candidates will be challenged by a range of exciting and engaging tasks to apply the knowledge and skills they have learned.

Why choose GCSE Computer Science?

Simply put, the skills you will learn. Not just how to program, apply algorithms, use networks and code your own video games and mobile applications – although you will do plenty of that. You will learn skills and techniques that will help you in your career, whatever you go on to do. Basic project management techniques; product development cycles; problem solving; skills that you will find useful every day in every career, not just the IT industry. There is also the understanding you will get from modern technology – not just how to use it but how to create it and how information is stored, transferred, manipulated and controlled.

What will I learn?

- Programming - you will be taught at least one programming language, and will use it practically and creatively
- Algorithms - and why they are at the heart of how computers work
- Data - how it is handled and stored and what it can be used for
- Hardware - how computers and networks are made up and how they communicate
- Basic concepts of software engineering - the product development lifecycle, prototyping and application testing

In short, you will get a solid grounding in the concepts of computer science, and learn a wide range of valuable skills that will help equip you for your working life.

Course recommendation

- It would help to have at least a minimum Grade 4 in Maths (but all pupils may opt for this subject)

Books/Resources pupils might find useful to have access to at home

- ISBN: 978-1-4441-9384-8 OCR approved Computer Science GCSE book.
- My Revision Notes—by Sean O’Byrne and George Rouse

Miss E Holt - Head of Computer Science

FRENCH GCSE

Exam Board - Edexcel

Course Content

This course allows pupils to develop their ability to communicate with French native speakers in both speech and writing. They will study across a variety of contexts relevant to their age and interests and will also develop a greater awareness of the culture of French speaking communities and countries. They will learn to express opinions about a variety of topics such as holidays, TV and films, the environment, the local area, technology, education, career and future plans. They will also learn transactional language which will be useful in a variety of situations likely to be encountered during travel abroad, such as at restaurants, tourist offices, airports and hotels. Pupils will need to develop and use their knowledge and understanding of French grammar progressively through their course of study.

Skills the Course will Develop

1. Listening: understanding spoken information in French
2. Speaking in French
3. Reading: understanding written information in French
4. Writing in French
5. Cultural awareness of France and the French speaking world
6. Literacy in English

Assessment Information:

Exams will take place at the end of Year 11

Paper 1 – Listening (25%)

Paper 2 – Speaking (25%): internally conducted, recorded and externally marked

Paper 3 – Reading (25%) including translation from French into English

Paper 4 – Writing (25%) including translation from English into French

Please note that all skills are now assessed via final exam only. There is no longer any controlled assessment element within this GCSE.

Career/Life Skills/Value of Subject

Any modern language GCSE is a rewarding and enriching qualification. It provides evidence of both academic ability and practical skill which carries a value beyond the qualification alone. Language skills are valued by employers in an increasing number of fields including travel and tourism, catering, finance, journalism, law, secretarial work, sales and teaching (especially at primary level). A number of degree courses within both arts and sciences now demand at least a Grade 5 in a language as an entry requirement, and others reserve the right to add this requirement in future years.

CHINESE (MANDARIN) GCSE

Exam Board - Edexcel

Course Content

This course allows pupils to develop their ability to communicate with Chinese native speakers in both speech (using Mandarin, the national language of China) and writing. They will study across a variety of contexts relevant to their age and interests and will also develop a greater awareness of the culture of Chinese speaking communities and countries. They will learn to express opinions about a variety of topics such as holidays, TV and films, the environment, the local area, technology, education, career and future plans. They will also learn transactional language which will be useful in a variety of situations likely to be encountered during travel abroad, such as at restaurants, tourist offices, airports and hotels. Pupils will need to develop and use their knowledge and understanding of simplified Chinese characters and grammatical structures through their course of study.

Skills the Course will Develop

1. Listening: understanding spoken information in Mandarin
2. Speaking Mandarin Chinese
3. Reading: understanding written information in Chinese
4. Writing in Chinese
5. Cultural awareness of China and the Chinese speaking world
6. Literacy in English

Assessment Information:

Exams will take place at the end of Year 11

Paper 1 – Listening (25%)

Paper 2 – Speaking (25%): internally conducted, recorded and externally marked

Paper 3 – Reading (25%) including translation from Chinese into English

Paper 4 – Writing (25%) including translation from English into Chinese

Please note that all skills are now assessed via final exam only. There is no longer any controlled assessment element within this GCSE.

Career/Life Skills/Value of Subject

Any GCSE in a modern language is a rewarding and enriching qualification. The GCSE in Chinese is a rare opportunity and may confer significant advantages in future study and careers. It provides evidence of both academic ability and practical skill which carries a value beyond the qualification alone. Language skills are valued by employers in an increasing number of fields including travel and tourism, catering, finance, journalism, law, secretarial work, sales and teaching (especially at primary level). More and more degree courses within both arts and sciences now demand at least a Grade 5 in a language at GCSE as an entry requirement, and others reserve the right to add this requirement in future years.

SPANISH GCSE

Exam Board - Edexcel

Course Content

This course allows pupils to develop their ability to communicate with Spanish native speakers in both speech and writing. They will study across a variety of contexts relevant to their age and interests and will also develop a greater awareness of the culture of Spanish speaking communities and countries. They will learn to express opinions about a variety of topics such as holidays, TV and films, the environment, the local area, technology, education, career and future plans. They will also learn transactional language which will be useful in a variety of situations likely to be encountered during travel abroad, such as at restaurants, tourist offices, airports and hotels. Pupils will need to develop and use their knowledge and understanding of Spanish grammar progressively through their course of study.

Skills the Course will Develop

1. Listening: understanding spoken information in Spanish
2. Speaking in Spanish
3. Reading: understanding written information in Spanish
4. Writing in Spanish
5. Cultural awareness of Spain and the Spanish speaking world
6. Literacy in English

Assessment Information:

Exams will take place at the end of Year 11

Paper 1 – Listening (25%)

Paper 2 – Speaking (25%): internally conducted, recorded and externally marked

Paper 3 – Reading (25%) including translation from Spanish into English

Paper 4 – Writing (25%) including translation from English into Spanish

Please note that all skills are now assessed via final exam only. There is no longer any controlled assessment element within this GCSE.

Career/Life Skills/Value of Subject

Any modern language GCSE is a rewarding and enriching qualification. It provides evidence of both academic ability and practical skill which carries a value beyond the qualification alone. Language skills are valued by employers in an increasing number of fields including travel and tourism, catering, finance, journalism, law, secretarial work, sales and teaching (especially at primary level). A number of degree courses within both arts and sciences now demand at least a grade 5 in a language at GCSE as an entry requirement, and reserve the right to add this requirement in future years.

Creative and Technical Skills Subjects

GCSE - Art, Craft & Design - Fine Art

GCSE - Art, Craft & Design - Textiles

GCSE - Design Technology - Graphic Design

GCSE - Design Technology - Resistant Materials

GCSE - Drama

GCSE - Food Preparation & Nutrition

GCSE - Media

GCSE - Music

GCSE - Photography

GCSE - Physical Education

Art Craft and Design - Fine Art GCSE
Exam Board & Code - AQA 8201

It is not possible to choose both Fine Art and Textiles .

Course Content

Fine Art promotes learning across a variety of experiences and through various processes, tools, techniques, materials and resources to generate different kinds of evidence of working and outcomes. The Fine Art element explores ideas, conveys experiences or responds to themes or issues of personal significance.

The areas of study are very broad and cover drawing, painting, sculpture, installation, lens based media and mixed media.

Fine Art offers opportunities to use your creativity to express yourself. You will develop your understanding of creative processes, your ability to observe and to think, to solve problems and to communicate in a visual way. It will enable you to work independently and to make your own discoveries by exploring ideas, other artists' work and different materials and techniques. Fine Art gives you the skills and knowledge to create personal and imaginative work. If you have an adventurous, creative and enquiring mind and are excited by shaping and determining the visual world around us, there is a career opportunity waiting for you.

Pupils will also have the opportunity to do a unit of work that explores the use of digital photography and post processing skills in Photoshop. This forms part of the requirement of Art, Craft and Design and will give pupils the opportunity to specialise in more than one area of their creative journey.

How will you be assessed?

There are two components:

Component 1 Portfolio: must show evidence of working in two or more areas of study taking into account the distinguishing characteristics of art, craft and design. This is worth 60 % of your overall marks.

Component 2 Externally Set Assignment: must show evidence of areas of study drawn from one or more of the titles. This is worth 40 % of your total marks.

What skills will you learn?

Alongside improving your practical expertise, you'll learn how to develop, refine and record your ideas; present a personal response that realises your intentions; improve your creative skills through the effective and safe use of media, materials, techniques, processes, and technologies; successfully use visual language and the formal elements e.g. colour, line, form, shape, tone, texture, use drawing skills for different needs and purposes.

How will it fit in with your other subjects?

Studying art and design helps to create a broad and balanced curriculum, which is an excellent foundation for whatever you want to do afterwards. The transferable skills you'll gain, such as creativity, analysis and problem solving, complement a range of other subjects and careers.

Where will a creative GCSE take you?

You can continue your art and design studies at A-level, where the same specialisms are available. You'll also be able to choose areas of study to specialise in within a particular title. If you don't want to take your art and design studies any further, the transferable skills you gain will still be valuable. You'll develop problem solving, creative thinking, investigation, research, communication and teamwork skills, and gain the ability to develop, refine and present ideas. Employers and universities regard all of these highly.

Mr A Hadden - Head of Art

Art Craft and Design - Textiles GCSE

Exam Board & Code - AQA 8201

It is not possible to choose both Fine Art and Textiles .

Course Content

Textiles promotes learning across a variety of experiences and through various processes, tools, techniques, materials and resources to generate different kinds of evidence of working and outcomes. It is your chance to design products for woven, knitted, stitched, printed or decorative textiles. Areas of study include fashion design and illustration, costume design, constructed textiles, printed and dyed textiles and digital textiles.

The textile design course offers the opportunity to develop skills over a broad range of textile and fashion techniques and applications, such as printing, weaving, knitting, mixed media, digital applications, surface design, embroidery and installation. Practical work is produced by researching and developing ideas using drawing, digital exploration, sketchbooks and work sheets, supported by critical evaluation and an awareness of contemporary and historical influences.

Pupils will also have the opportunity to do a unit of work that explores the use of digital photography and post processing skills in Photoshop. This forms part of the requirement of Art, Craft and Design and will give pupils the opportunity to specialise in more than one area of their creative journey.

How will you be assessed?

There are two components:

Component 1 Portfolio: must show evidence of working in two or more areas of study taking into account the distinguishing characteristics of art, craft and design. This is worth 60 % of your overall marks. In this case Textiles, Fine Art and Photography will be the three titles.

Component 2 Externally Set Assignment: must show evidence of areas of study drawn from one or more of the titles. This is worth 40 % of your total marks.

What skills will you learn?

Alongside improving your practical expertise, you'll learn how to develop, refine and record your ideas; present a personal response that realises your intentions; improve your creative skills through the effective and safe use of media, materials, techniques, processes, and technologies; successfully use visual language and the formal elements e.g. colour, line, form, shape, tone, texture, use drawing skills for different needs and purposes.

How will it fit in with your other subjects?

Studying art textiles helps to create a broad and balanced curriculum, which is an excellent foundation for whatever you want to do afterwards. The transferable skills you'll gain, such as creativity, analysis and problem solving, complement a range of other subjects and careers.

Where will a creative GCSE take you?

You can continue your art and design studies at A-level, where the same specialisms are available. You'll also be able to choose areas of study to specialise in within a particular title. If you don't want to take your art and design studies any further, the transferable skills you gain will still be valuable. You'll develop problem solving, creative thinking, investigation, research, communication and teamwork skills, and gain the ability to develop, refine and present ideas. Employers and universities regard all of these highly.

Mr A Hadden - Head of Art

DESIGN TECHNOLOGY GCSE - GRAPHIC DESIGN

Exam Board & Code - Eduqas - 603/1121/6

*It is not possible to choose both
Graphic Design and Resistant Materials*

Course Content

Within Design Technology-related industries there is a deliberate move away from defining the subject by material specialism, requiring knowledge and skills across a variety of materials. The Design Technology GCSE allows candidates to learn across the spectrum while giving an opportunity to specialise in areas of interest. Within the Graphic Design course pupils will have a greater opportunity to develop design technology skills in this area.

The Design and Technology GCSE will prepare pupils to participate confidently and successfully in an increasingly technological world. Pupils will gain awareness and learn from wider influences on Design and Technology including historical, social, cultural, environmental and economic factors. Pupils will get the opportunity to work creatively when designing and making and apply technical and practical expertise.

Pupils will

- Demonstrate their understanding that all design and technological activity takes place within contexts that influence the outcomes of design practice
- Develop realistic design proposals as a result of the exploration of design opportunities and users' needs, wants and values
- Use imagination and experimentation and combine ideas when designing
- Develop the skills to critique and refine their own ideas whilst designing and making
- Communicate their design ideas and decisions using different media and techniques, as appropriate for different audiences at key points in their designing
- Develop decision-making skills, including the planning and organisation of time and resources when managing their own project work
- Develop a broad knowledge of materials, components and technologies and practical skills to develop high quality, imaginative and functional prototypes
- Be ambitious and open to explore and take design risks in order to stretch the development of design proposals, avoiding clichéd or stereotypical responses
- Consider the costs, commercial viability and marketing of products
- Demonstrate safe working practices in design and technology
- Use key design and technology terminology including those related to: designing, innovation and communication; materials and technologies; making, manufacture and production; critiquing, values and ethics

Assessment information

- Coursework 50% (35 hours)
- Written paper 50% (2 hours)

Career/Life Skills/Value of Subject

This course will help pupils to progress to A Level Graphic Communication and also to degree/vocational courses. The creative and strategic skills that pupils will gain are directly transferable to industry. There is an increasing demand for high quality individuals with skills relevant to design, engineering, technical, communication, technology and media industries. This course provides the first step for a future career in design and product development.

Mr A Crick - Head of Technology

DESIGN TECHNOLOGY GCSE - RESISTANT MATERIALS

Exam Board & Code - Eduqas - 603/1121/6

*It is not possible to choose both
Graphic Design and Resistant Materials*

Course Content

Within Design Technology-related industries there is a deliberate move away from defining the subject by material specialism, requiring knowledge and skills across a variety of materials. The Design Technology GCSE allows candidates to learn across the spectrum while giving an opportunity to specialise in areas of interest. Within the Resistant Materials course pupils will have a greater opportunity to develop resistant material skills in this area.

The Design and Technology GCSE will prepare pupils to participate confidently and successfully in an increasingly technological world. Pupils will gain awareness and learn from wider influences on Design and Technology including historical, social, cultural, environmental and economic factors. Pupils will get the opportunity to work creatively when designing and making and apply technical and practical expertise.

Pupils will:

- Demonstrate their understanding that all design and technological activity takes place within contexts that influence the outcomes of design practice
- Develop realistic design proposals as a result of the exploration of design opportunities and users' needs, wants and values
- Use imagination and experimentation and combine ideas when designing
- Develop the skills to critique and refine their own ideas whilst designing and making
- Communicate their design ideas and decisions using different media and techniques, as appropriate for different audiences at key points in their designing
- Develop decision-making skills, including the planning and organisation of time and resources when managing their own project work
- Develop a broad knowledge of materials, components and technologies and practical skills to develop high quality, imaginative and functional prototypes
- Be ambitious and open to explore and take design risks in order to stretch the development of design proposals, avoiding clichéd or stereotypical responses

- Written paper 50% (2 hours)

Career/Life Skills/Value of Subject

This course will help pupils to progress to A Level Graphic Communication and also to degree/vocational courses. The creative and strategic skills that pupils will gain are directly transferable to industry. There is an increasing demand for high quality individuals with skills relevant to design, engineering, technical, communication, technology and media industries. This course provides the first step for a future career in design and product development.

DRAMA

Exam Board - OCR

Course of Study

Drama will inspire, challenge and motivate you. There is a firm emphasis on practical performance skills, and the specification we have chosen enables pupils to explore voice, movement, character and staging working from an exciting existing text; and to use these skills to devise and perform their own original piece.

Drama also requires pupils to cast a critical eye across several aspects of performance, helping pupils to analyse and evaluate both play-texts and live performances. For those most interested in the design and technical aspects of theatre production, the specification also allows the scope for you to specialise in these disciplines, instead of acting.

Practical

The subject content for GCSE Drama is divided into three components:

- Understanding drama
- Devising drama
- Texts in practice

Component 1 - Understanding drama

Knowledge and understanding of drama and theatre

Study one of six set plays

Analyse and evaluate the work of live theatre makers

Unit Assessment

Written exam (1 hour 45 minutes)

Open book

40% of the GCSE

Component 2—Devising drama

Process of creating devised drama

Performance of devised drama (pupils may contribute as performer or designer)

Analysis and evaluation of own work

Unit Assessment

Devising log

Devised performance

40% of the GCSE

Component 3—Texts in practice

Performance of two extracts from one play (pupils may contribute as performer or designer)

Free choice of play but it must contrast with the set play chosen for Component 1

Unit Assessment

Performance of Extract 1 (10%) **and** Extract 2 (10%)

20% of the GCSE

Career/Life Skills/Value of Subject

Build confidence in speaking and communication, while also developing the ability to look at how different strategies will impact the feeling and attention of your audience. Drama also enriches and develops a wider cultural understanding of our society.

FOOD PREPARATION AND NUTRITION GCSE

Exam Board - Eduqas

Course of Study

The WJEC /Eduqas GCSE in Food Preparation and Nutrition will equip pupils with the knowledge, understanding and skills required to cook and apply the principles of food, science, nutrition and healthy eating.

Practical

Practical work is an essential part of the course. Pupils will need to bring in cooking ingredients every week. (There may be some financial support available for pupils who receive free school meals).

Course Content

1. Food commodities
2. Principles of nutrition
3. Diet and good health
4. The science of food
5. Where food comes from
6. Cooking and food preparation

Unit Assessments

Component 1: Principles of food preparation and nutrition

(Written examination 1 hour and 45 minutes) 50% of qualification.

This component will consist of two sections, both containing compulsory questions, and will assess the full range of specified GCSE content.

Section A: Questions based on a stimulus/theme.

Section B: A range of question types to assess content related to food preparation and nutrition.

Component 2: Food preparation and nutrition in action

Non examination assessment (NEA) — 50% of qualification

The pupils will be given the opportunity to develop their knowledge and understanding of the **six areas** of content. They will also be given the opportunity to develop technical skills through practical and experimental work.

Assessment 1: a scientific food investigation of no more than 2000 words. (15%)

Assessment 2: a practical assessment where the pupil has to plan, cook and present three dishes with accompaniments. (35%)

Career/Life Skills/Value of Subject

Following this qualification will encourage pupils to cook and enable them to make informed decisions about food and nutrition in order to be able to feed themselves and others affordably and nutritiously, now and later in life.

MEDIA GCSE

Exam Board - OCR

Course Content

Media Studies aims to develop investigative, critical thinking and decision-making skills through consideration of issues that are important, real and relevant to learners and to the world in which they live. Pupils will develop their appreciation and critical understanding of the media and its role in their daily lives, as well as developing their practical and creative skills through opportunities for personal engagement and creativity. They will be taught how to use media concepts and ideas to analyse media productions in their various contexts. The course is designed to allow pupils to draw on their existing experience of the media and to develop their abilities to explore, as well as to create a wide variety of media, drawing on the fundamental concepts informing the study of the media.

Topics of Study

- genre
- narrative
- representation
- media organisations: marketing and promotion, regulation and control, ethics
- media audiences

All of the topics will be taught through a variety of media: film, television, newspapers, music, magazines, radio, computer games and web sites.

Assessment Information

- 30% practical component, in which pupils apply knowledge to research, plan and create their own music video or magazine cover, using set briefs.
- 70% written examination.

The examination components are:

- Television and Promoting Media (35%).
Section A of this paper includes 5 questions, covering all topics of study, based around the TV shows *Cuffs* (2015) and *The Avengers* (1965), providing contrasts between television as both historical artefact and a part of modern culture.
In Section B, a further 4 questions assess learners' knowledge of film promotion and marketing based around *The Lego Movie*, which incorporates a study of the Lego franchise in video games.
- Music and News (35%)
In Section A there are 5 questions covering the promotion and distribution of music, incorporating study of *Mojo* magazine, 2 set music videos and the *Radio 1 Live Lounge*.
Section B includes a further 5 questions on newspapers and news websites, using *The Observer* as a set text.

Career/Life Skills/Value of Subject

This course will provide challenge and excitement. The nature of media is that it is always changing, so the topics will always be fresh and relevant to everyday life. It will encourage pupils to challenge assumptions, critically analyse texts and create their own products. It will be an excellent stepping stone for any pupils wanting to study Media A level, but also complements the core subject of English. It is a very useful qualification in a wide range of employment fields, such as advertising, journalism, theatre, television and film, writing and design. Norfolk is gaining a reputation as a great place to make movies and high budget television shows, including a number of Netflix original productions, so for learners in this area there has never been a better time to study Media.

Mr P Smedley - Teacher in charge of Media Studies

MUSIC GCSE

Exam Board & Code - Edexcel 1MU0

The GCSE Music course is suitable for any keen singer, instrumentalist or composer. You do not need to be having instrumental/voice lessons at the moment although it is recommended that you should take advantage of the free instrumental lessons provided by the school in your chosen instrument when you begin the GCSE course. It is never too late to begin learning an instrument and any pupil who has enjoyed Music up to Year 9 and has an aptitude for the subject may consider the possibility of taking GCSE Music. Music lessons at GCSE are very different from the lessons in Lower School. The groups are usually quite small and the learning environment is much more informal. Pupils learn a lot by studying the music of others (including their own work) and discussing it within the group. This enables them to see what can be effective in musical composition and also what doesn't work. We endeavour to perform music regularly, either as a group, or as individuals.

The GCSE content for Music falls into three units, which will be taught together through a range of practical activities:

Unit 1. Performing (30% - Coursework) - Pupils are required to perform two pieces, one as a solo and one as part of an ensemble (group) on an instrument, or as a singer. These can be on any instrument and the two performances can be on different instruments if the pupil wishes. The performances can be in any style of music, from classical to rock/pop.

Pupils are required to provide at least 4 minutes of performances, which will be recorded. It is expected that by the end of Year 11, pupils should be working at approximately Grade 3 – 5 practical exam standard. The school will support GCSE Music Pupil tuition one half hour lesson per week (30 weeks per year) where a suitable instrumental teacher is available for the chosen instrument. Please discuss this with the Music Teacher.

Unit 2. Composing (30% - Coursework) - Throughout the GCSE course pupils will be introduced to a range of key composing techniques and the study of music from all styles/genres which will lead to the completion of two compositions (the first to a brief, the second is free choice). Pupils may use Cubase (a music sequencing programme) or MuseScore (a music notation programme), to complete and record their work. A basic knowledge and understanding of music theory is useful, but not essential.

Unit 3. Listening and Appraising (40% - Exam) - Over the period of the GCSE Music course pupils will study a range of music including pop and rock, world music, classical music and jazz styles. Pupils will also study eight musical works in detail. At the end of the course the pupil's knowledge and understanding of musical language and style will be assessed in a exam which lasts 1 hour and 45 minutes. Pupils are played extracts of selected set works and answer questions on the music, which will be short answers and multiple choice. There is also a longer question where pupils are asked to compare a piece they know with a piece they don't know. This question will require a little more writing than the other questions.

Career/Life Skills/Value of Subject

This course will enable pupils to actively engage in the study of music and develop skills and interests, including the ability to make music both individually and in groups. It will also allow pupils to understand and appreciate a range of different types of music and encourage them to become effective, independent learners. The course will also develop broader life skills and attributes including critical and creative thinking, emotional awareness, cultural understanding, self-discipline, self-confidence and self-motivation.

It is also a good preparation for further musical study and provides a foundation for A-Levels in Music and Music Technology. Many people wish to try and work in the performing arts and music. Career and employment opportunities include the music industry, publishing, teaching, entertainment, health therapy and any job that involves communication and expressive skills. There are also many benefits from studying music which reach far beyond the subject itself. It is well documented that studying music has many educational benefits. Employers, colleges and universities generally look very favourably on music as a subject, as it suggests a person will have many additional skills.

PHOTOGRAPHY GCSE

Exam Board & Code - AQA 8206

Course Content

Produce images using light-sensitive materials such as photographic film, or digital methods of development and production to create static or moving images. Areas of study could include portraiture, installation, photo-journalism, moving image (film, video and animation) and fashion photography. Photography is about looking, learning, thinking and communicating ideas. It inspires creative thinkers. Photography means 'drawing with light' and that is what photographers do when they take a picture. Many photographers have explored various techniques to create images that make a personal statement about things that have interested or concerned them. The most exciting aspect of photography is that you are capturing the world as you see it.

Pupils who wish to study photography at GCSE level will be expected to have access to their own digital camera. Please note, although there may be some cases where a mobile phone camera is appropriate, it is not to be used as a primary camera for taking coursework photographs.

How will you be assessed?

There are two components:

Component 1 Portfolio: Pupils produce a sustained project based on internally set themes and development of technical skills, and a selection of further work that represents the course of study. This is worth 60 % of your overall marks.

Component 2 Externally Set Assignment: This component is externally set by the exam board. It features seven tasks and you have to complete one of them. The paper is usually released in January and pupils then embark on their preparation time, culminating in a skills test of ten hours of supervised time. This is worth 40 % of your total marks.

What skills will you learn?

Alongside improving your practical expertise, you'll learn how to develop, refine and record your ideas using a range of digital and traditional photographic skills, techniques and processes.

Present a personal response that realises your intentions; improve your creative skills through the effective and safe use of digital media, materials, techniques, processes, and technologies, successfully use visual language and the formal elements e.g. colour, line, form, shape, tone, texture, use drawing skills through the camera for different needs and purposes.

How will it fit in with your other subjects?

Studying photography helps to create a broad and balanced curriculum, which is an excellent foundation for whatever you want to do afterwards. The transferable skills you'll gain, such as creativity, analysis and problem solving, complement a range of other subjects and careers.

Where will a creative GCSE take you?

You can continue your photographic studies at A-level, where the same options for digital, traditional and physical photography are available. You'll also be able to choose areas of study to specialise in. If you don't want to take your photography studies any further, the transferable skills you gain will still be valuable. You'll develop problem solving, creative thinking, investigation, research, communication and teamwork skills, and gain the ability to develop, refine and present ideas. Employers and universities regard all of these highly.

PHYSICAL EDUCATION GCSE

Exam Board & Code - Edexcel 1PE0

Course Content

This course will give pupils exciting opportunities to be involved in a number of different physical activities, promoting an active and healthy lifestyle. Pupils will be assessed as a performer in three sports. It will appeal to individuals who:

- have a keen interest in sport and exercise science
- take part in sport/recreation outside class time
- want to know more about the benefits of sport and exercise
- are considering a sports-related career or an A Level/higher education course in PE

Skills the course will develop

Pupils will:

- develop their knowledge and practical skills in a range of physical activities
- examine the effects of exercise and how training can improve performance
- identify ways to develop and maintain a healthy and active lifestyle through participation in physical activity
- appreciate the benefits of promoting 'sport for all'

Assessment Information

The course is assessed over four components:

Component 1:

This is externally assessed through a written examination paper of 1 hour and 45 minutes. It will contribute a maximum of 36% towards the total marks. The paper is broken down into four areas:

- Topic 1: Applied anatomy and physiology
- Topic 2: Movement analysis
- Topic 3: Physical training
- Topic 4: Use of data

Component 2:

This is externally assessed through a written examination paper of 1 hour and 15 minutes. It will contribute a maximum of 24% towards the final marks. The paper is broken down into four areas:

- Topic 1: Health, fitness and well-being
- Topic 2: Sport psychology
- Topic 3: Socio-cultural influences
- Topic 4: Use of data

Component 3:

This requires practical performance in three different sports. It will contribute a maximum of 30% towards the final marks.

- One must be a team sport.
- One must be an individual sport.
- The final one is a free choice. Please ask your teacher for a list of accepted sports.

Component 4:

This is a Personal Exercise Programme and is 10% of the final marks.

Career/Life Skills/Value of Subject

As well as being the ideal preparation for the A Level Physical Education course, GCSE PE allows for progression to related vocational qualifications, such as BTEC Firsts and Nationals in Sport or Sport and Exercise Sciences. The course develops the transferable skills and key skills that employers are looking for and can lead to a wide variety of employment opportunities. This can include further training in such areas as recreational management, leisure activities, the fitness industry, the armed forces and the Civil Service.

Humanities and Social Sciences Subjects

GCSE - Business Studies

Cambridge National - Child Development

GCSE - Geography

GCSE - History

GCSE - Religious Studies

GCSE - Sociology

BUSINESS GCSE

Exam Board & Code - AQA 8132

Course Content

The course consists of six units which will be studied over two academic years in Year 10 and Year 11.

Businesses in the real world: This section introduces candidates to issues concerning the setting up and operation of a business in the real world. It explores why people establish businesses and what forms they take. The unit looks at the activities of business and the reasons for success or failure. It encourages candidates to appreciate that businesses must operate within society and that this involves businesses engaging with a wide range of stakeholders who will hold differing perspectives.

Influences on Business: This section encourages pupils to appreciate that businesses operate in a wider external environment and explores the forces that influence business activity including changes in technology, ethical considerations, the economic climate, the competitive environment, business law and globalisation.

Business operations: Under business operations we begin to look at the internal running of the business, including the study of purchasing operations, quality control and customer service.

Human Resources: We will then move on to look at people in business. We will study the various structures a business might take and how recruitment and selection is used to find the best staff. We will also study the motivation and training of employees.

Marketing: Businesses have to market, promote and sell their products to be successful. In marketing, we look at how businesses identify their customers and divide them into segments in order to focus activity. We will look at market research methods and study the marketing mix.

Finance: The final section of the course is about financial management and control. We will look at where the money comes from to start a business and grow it. We will study the importance of cash flow and learn some of the important financial calculations that businesses use to control their performance.

Key skills:

- A clear understanding of business operations and activity
- The ability to analyse key business situations
- The ability to evaluate business actions and decisions
- Teamwork and group activities
- Independent learning
- Strong mathematical ability

Assessment Information

The course is assessed with 2 examinations at the end of Year 11. Each examination will last 1 hour and 45 minutes.

Career/Life Skills/Value of Subject

All pupils leaving school will work in organisations in both the public and private sectors and it is hoped that many will at some time in their lives run their own businesses. This course is designed to introduce pupils to the essential aspects of business so that when they enter organisations they will be familiar with the structure and operation of their workplace. Our aim is to help pupils to achieve a level of business awareness that will allow them to make a valuable contribution to the organisations for which they work at a very early stage.

Mr M Pittaccio - Teacher in charge of Business Studies

CHILD DEVELOPMENT (CAMBRIDGE NATIONAL)

Exam Board & Code - OCR J818

Course Content

The Cambridge National Certificate in Child Development focuses on child development from conception to the age of five. It is designed to develop knowledge and understanding of the needs of young children and the social and environmental influences which affect their development in a contemporary, changing and diverse society. Through external and internal assessments, pupils have the opportunity to develop their research, planning, observation and evaluation skills.

Topics of Study

Roles and responsibilities of parenthood

- Antenatal care and preparation for birth
- Postnatal checks, postnatal provision and conditions for development
- Childhood illnesses
- Child safety
- Equipment for babies and children from birth to five years
- Nutrition and feeding solutions for children from birth to five years
- The physical, intellectual and social developmental norms from birth to five years
- Learning through play

Assessment Information

- Written examination (50% of the final mark)
R018 Health and well-being for child development
- Centre assessed, OCR moderated tasks (25%)
R019: Understand the equipment and nutritional needs of children from birth to five years
- Centre assessed/OCR moderated tasks (25%)
R020: Understand the development of a child from birth to five years

Career/Life Skills/Value of Subject

This qualification is for pupils who wish to develop applied knowledge and practical skills in child development. It is designed with both practical and theoretical elements, which will prepare pupils for further qualifications e.g. A Levels or Technicals in Child Care, Health and Social Care, Psychology, Sociology and Biology. They may then continue their studies at university with the intention of pursuing careers in the caring professions e.g. primary education, nursing, midwifery and social work. Valuable life skills on how to be a good parent are also taught on this course.

GEOGRAPHY GCSE

Exam Board & Code - Edexcel 1GA0

Course Content

The Geography GCSE course is based upon a study of Physical and Human Geography.

The main themes covered in Physical Geography are the changing landscapes of the UK including:

- Coastal landscapes and processes and river landscapes and processes
- Weather hazards and climate change
- Ecosystems, biodiversity and management

The main themes included in Human Geography are :

- Changing Cities
- Global Development
- Resource Management, including an optional sub-topic of Water Resource Managements

Skills the Course will Develop

A number of key skills are important to the study of Geography. Pupils will develop their ability to use atlases, Ordnance Survey maps and GIS, to create and interpret graphs and statistics and learn how to collect and analyse primary data from fieldwork. The use of information and computer technology will be integrated into the work throughout the course. They will learn to make decisions on important issues and develop the skills to put forward their viewpoint using supporting evidence.

Assessment Information

- Physical Geography paper (37½% of overall mark)
- Human Geography paper (37½% of overall mark)
- Geographical Investigations: Fieldwork and UK challenges (25% of overall mark)

Career/Life Skills/Value of Subject

Geography is a subject that leads to a greater understanding of the world in which we live. It encourages an understanding of different cultures of the world, together with a tolerance for the views and opinions of others.

If you enjoy the course you might decide to specialise in Geography and use it as a qualification for employment. As the world's largest industry, the tourism industry is obviously a possible choice. A Level and degree courses might lead to employment in such areas as environmental management and planning. The most popular employment area for Geography graduates is administration and operations management. Both of these areas reflect Geography's emphasis on investigative decision making and planning.

As more people now work in the service sector rather than manufacturing, employers are increasingly looking to people with qualifications in the Humanities subjects that develop an understanding of human behaviour.

HISTORY GCSE

Exam Board & Code - Edexcel 1HI0

Course Content

Pupils will study four units (topics) of history. These units will consist of an in depth study of Anglo-Saxon and Norman England: c1060-1088, International Relations (the Cold War): 1941-1991 and Modern Germany: 1918-1939. The fourth topic will be a thematic study of Crime and Punishment from the year 1000 to the present day. All four of these units will be assessed by examinations in the summer of Year 11.

Skills the Course will Develop

The course develops the skills of analysing different forms of evidence, utilising information in a coherent way and the ability to question. The course will help the development of extended writing skills, required for post-16 studies.

Assessment Information

Paper 1: Crime and Punishment c1000-present day	30% of final grade
Paper 2: Cold War and Anglo-Saxon and Norman England	40% of final grade
Paper 3: Germany 1918-1939	30% of the final grade

Career/Life Skills/Value of the Subject

History is a subject welcomed and recognised by all employers and results at Reepham High School and College have been good for a number of years. Beyond this, it is a subject that develops an understanding of human beings, their motivation and the reasons for their behaviour, and a greater understanding of the wider world.

Employers are increasingly looking to people with qualifications in the humanities as they are subjects that develop an understanding of human behaviour and help individuals develop their own valuable life skills.

RELIGIOUS STUDIES GCSE

Exam Board & Code - AQA 8062

Course Content

The Religious Studies course is based on the specification provided by AQA.

Across the two years, pupils will be following Route A. In Route A pupils must answer questions on two religions in Component 1A, and four religious, philosophical and ethical studies themes in Component 2A.

- Component 1A: The study of religions: beliefs, teachings and practices (Christianity & Islam)
Written exam: 1 hour 45 minutes 50% of GCSE
- Component 2A: Thematic studies (a choice of four religious, philosophical and ethical studies themes)
Theme A: Relationships and families
Theme B: Religion and life
Theme C: Existence of God and revelation
Theme D: Religion, peace and conflict
Theme E: Religion, crime and punishment
Theme F: Religion, human rights and social justice
Written exam: 1 hour 45 minutes 50% of GCSE

Skills the course will develop

- Knowledge and understanding of some of the beliefs, values and traditions of Christianity and other religions, especially as they relate to the topics outlined above
- Debating and communication skills through engaging ethical topics
- Form well structured arguments whilst being able to consider more than one point of view, a skill which is needed for many other written based subjects
- Investigate and respond to some fundamental questions of life raised by religion and human experience
- Pupils gain the opportunity to develop their own “Philosophy for Life” by exploring their own morality, beliefs and disbeliefs

Assessment Information

- Component 1A = 50%
- Component 2A = 50%
- All exams are completed at the end of Year 11

Career/Life Skills/Value of Subject

This course provides pupils with the opportunity to debate philosophical questions and discuss cultural changes. Pupils can explore a range of arguments and challenge their own and others’ views about the world. A GCSE course in Religious Studies is also valuable preparation for any job which involves an understanding of people in a range of contexts and environments. This is particularly true of those who hope to work in the professions that involve interacting with members of society from a range of backgrounds, such as nursing, teaching, social work, policing, journalism, etc. GCSE Religious Studies is based on an understanding of people’s views, therefore employers see it as a useful and valuable qualification.

Further Education

GCSE Religious Studies is acknowledged for a wide range of Humanities and Arts subjects, including A Levels such as Religious Studies, Philosophy and Ethics, English Literature, Law, Sociology, and Psychology. Further to A Levels, pupils can use this qualification to develop their academic profile by studying Theology, Anthropology and Philosophy, for example, at university level.

Miss L Reid - Teacher in charge of Religious Education

SOCIOLOGY GCSE

Exam Board & Code - AQA 8192

Course Content

Sociology is the study of how people create, organise and sustain their societies. It explores how human action both shapes and is shaped by surrounding economic, social and cultural structures and processes. Through studying families, education, crime and deviance, class and sociological research methods, new perspectives of social interaction and the world we live in will be revealed to you.

What skills will I need to succeed in this subject?

Analytical and communication skills will be necessary if you study sociology as you will compare and contrast perspectives on a variety of social issues, construct reasoned arguments, make substantiated judgements and draw reasoned conclusions. You will be expected to take part in discussions, role-plays, debates and presentations.

Skills the Course will Develop

By studying sociology, you will develop transferable skills including how to:

- investigate facts and make deductions
- develop opinions and new ideas on social issues
- analyse and better understand the social world

Assessment Information

Two exams of 1 hour and 45 minutes 100% May/June 2021

Paper 1: The sociology of families and education (50%)

What is assessed:

- The sociology of families and the sociology of education
- Relevant areas of social theory and methodology

Paper 2: The sociology of crime and deviance and social stratification (50%)

What is assessed:

- The sociology of crime and deviance and the sociology of social stratification
- Relevant areas of social theory and methodology

Career/Life Skills/Value of Subject

What will a qualification in this subject lead to?

Sociologists have many career options, including the Civil Service, the police, teaching, counselling, government departments, journalism and media, work with NGOs, pressure groups, overseas development, public relations, public opinion and politics, social and policy research and social care and health services.

Practical Skills Subjects

City & Guilds - Construction
ASDAN - Care of the Countryside

CONSTRUCTION

Construction Skills - City & Guilds Level 1 (6219-05)

Delivered at RHSC

Learners will earn an industry recognised mark of quality which will support them into employment and as they progress throughout their careers.

- **Level 1 Award in Construction Skills (Bricklaying)**
- **Level 1 Award in Construction Skills (Carpentry and Joinery)**

These qualifications provide the ideal introduction to the construction industry and cover essential skills in the construction trades: bricklaying, carpentry and joinery.

They are suitable for 14-19 year olds, or for individuals of any age wanting an introduction to the variety of construction trades, to gain skills in those areas and perhaps to decide which trade is the right one to pursue a career in. No previous knowledge or experience is required.

Level 1 Certificate in Construction is equivalent to one GCSE Grades 3-1.

For safety reasons, numbers are limited to 10 places.

CARE OF THE COUNTRYSIDE

ASDAN Personal Development Programmes: Bronze/Silver/Gold

Delivered at RHSC & local community projects

The ASDAN Personal Development Programmes offer imaginative ways of developing, recording and certificating a wide range of young people's personal qualities, abilities and achievements. As well as introducing them to new activities and challenges.

These programmes link to nationally recognised qualifications.

Pupils will complete several units that will develop a range of key skills including teamwork, learning and coping with problems. These key skills will offer pupils the chance to work as part of a team, learn something new or improve on current understanding. They will also enable pupils to recognise problems and find methods and solutions to solve them. A large proportion of the course involves undertaking practical tasks at RHSC and RHSC Allotment Project.

The key skills learnt and developed are valued by employers and institutions of further and higher education and will enable pupils to make the most of employment and training opportunities.

The personal development programmes can lead to nationally approved and regulated qualifications from ASDAN.

For safety reasons, numbers are limited to 10 places.

CHOOSING YOUR OPTIONS

Please complete the form on the following page. A quick overview of the option choices has been written below:

Geography or History	
Box 1 Business Studies Child Development Computer Science Geography History Media Religious Education Sociology Care of the Countryside* Construction*	Box 2 Art ¹ Drama Food Preparation French ³ Graphic Design ² Mandarin ³ Music Photography Physical Education Resistant Materials ² Spanish ³ Textiles ¹

¹ Art and Textiles cannot be combined.

² Graphic Design and Resistant Materials cannot be combined.

³ Your chosen language must have been studied in Year 9

Pupils will need to make the following choices:

- A) Select either GEOGRAPHY or HISTORY
All pupils must pick one of these.
- B) Select one option from Box 1
All pupils must pick one of these.
- C) Select one option from Box 2
All pupils must pick one of these.
- D) Select one other option from either Box 1 or 2

You must give a reserve for each choice. The reserve must include a new subject not mentioned in any of your first choices.

Important considerations:

RHSC strongly recommends that you take a modern foreign language at GCSE if you expect to take an academic route in the future. It shows a high level of skill and some university courses (which are not language based) require this.

The work-related learning courses have very limited places and are only offered to pupils for whom RHSC thinks them particularly appropriate.

Although we welcome choice and do our utmost to accommodate pupils' preferences, Reepham High School reserves the right to decide a pupil's suitability for a course.

Please return your form by Wednesday 4th March
